PROJECTS

Billing Machine in JAVA (05/2021 - 06/2021)

- I try to code in the IDE for the Billing Logic and I made this intermediate project in JAVA which works very well. As I used ArrayList to store the Products and I also Create two Classes one is Product and another is ShoppingBill which takes Data to the shop owner and Calculates the Total Bill that Buyer has to Pay.

Hospital Management System in JAVA (03/2021 - 04/2021)

- In this Project I use Core Java and Java Library with Classes and Objects. I created three classes i.e MainClass, Patient Class & Doctor Class which saves the data of the Doctor and Patient in their Object Reference and then these objects are added in a ArrayList to access later for the Old Entries as well. Also it has an option for Discharge patient as well.

Landing Web Page of Official Video Conferencing Website i.e ZOOM (07/2020 - 08/2020)

- Basically I created a Landing Web page of ZOOM website by Using HTML & CSS. I made that website with Certain HTML tags & CSS properties such as Class, Id's & selector. I hope you all like it & let me know the suggestions.

ACHIEVEMENTS

5-Star Problem Solver On HackerRank (06/2021)

I successfully achieved Golden Badge of 5-Star Problem Solving on HackerRank. I used to solve Problems on a Daily basis to improve my Logic Building and Problem Solving Skills.

4-Star in MySQL on HackerRank (05/2021)

I successfully achieved 4-Star in MySQL on HackerRank. As I also curious to know how database works and Data management is possible in MySQL. Where I solve multiple queries on Select and Advance Select

3-Star in JAVA Programming on HackerRank (05/2021)

I successfully achieved 3-Star rating badge in JAVA on HackerRank. As JAVA is Platform Independent and its a OOP oriented language as well. So that why I like to Code in JAVA more as compare to other Language but Surely I type code as well.
